

Weber-Isis Special Water Activator

Description

The Weber Isis Water Activator is a multi-layered accumulator for energetic water preparation which can be used universally. It works through a completely new physical process of specific wavelengths, frequencies, geometric form radiation, various organic and inorganic material designs and positive water data. Intended reactions are initiated on a fine-substance level..The Weber Isis Water Activator is a self-contained, self generating energy system, requires no maintenance and has no current. **It energetically charges the water pipes by counter-vibrations from the outside through the frequencies and vibrations that the Water Activator emits.**

- Very easy mounting
- No installation costs
- Portable
- Maintenance-free device
- Identical effect as installed devices
- Functions even in the proximity of electrical equipment
- Functions on geopathic disturbance fields
- Neutralizes negative space radiation by a built-in catalyst

Advantages of Using the Weber Isis Water Activator

- Better tasting drinking water
- Softens the water
- Eliminates contaminant data by dissolving them
- Energizes tap water
- Use less detergent
- Works harmoniously on people, animals, and plants
- Increases the heat conductivity of water
- Reduces water odours
- Skin does not dry out
- Improvement of water quality in house and bathrooms
- Puts oxygen into the water
- Water in the heating circuit remains clear (**no pipe corrosion**)
- Dissolves calcification
- After there is no more calcification in your water heater, it reduce the amount of energy consumed by your tank.

Adapted

For residential houses, industries, commercial buildings,etc.

Technical characteristics

- Height: 28.92 cm
- Wide: 14.46 cm
- Width: 5.41 cm
- Optimal diameter of the pipes: 1 to 1¼ inch
- Maintenance: none

Inside the water activator

- made of high-grade steel
- multi-layered accumulator
- Crystal rocks with quartz sand
- Glass bulb containing oxygen and activated water
- Protective gear inside the machine for a better protection

Weber-Isis Special Water Activator

How to Install

Before

After

This is the inside of an electric water boiler before and a few weeks after the installation of a water activator.

As you can see this portative model can be easily mounted. It's powerful enough to energize all the water in your house, and if you live in an apartment, it can be installed under your sink. **Don't forget to take it with you when you move out!!!!**

Calcification is the major reason why people need to change their water tanks more frequently. With our water activators, their water heaters will have a **longer life** and they will **cost less energy** to heat the water.

Calcification

Before

After

Here is a representation of the effectiveness of our systems on calcification. This is the results after a few weeks of water treatment.
