The Weber Isis Light Body Transformer

The Weber Isis Light Body Transformer works through the geometric form radiation of a figure eight. A strong energy field is generated by the vibration of the 13 grooves and the length of 7.23 cm (wave-length 7.23 cm = cosmic key). The geometry of both caps has been borrowed from the research of Victor Schauberger. The Weber Isis Light Body Transformer is de-polarized by the holes in both sides.

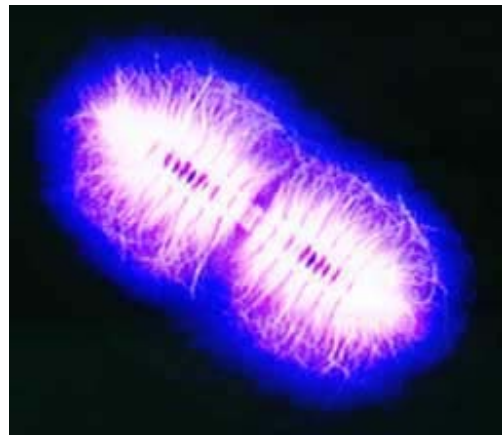

The interior of the Weber Isis Light Body Transformer is hollow and filled with 13 round crystals, which were cultivated on a gold thread helix turned 26 times. Above and below are 6 rock crystals with the vibration of Herkimer diamonds, in the middle of which is a high-carat emerald.

The crystals in the Weber Isis Light Body Transformer are charged with thousands of positive data, vibrations, and frequencies, which the body uses according to the bioresonance principle. It represents a microcosm, and the wearer is the macrocosm belonging to it. The Weber Isis Light Body Transformer vibrates to the energy field of the individual person and should not be worn by several persons.

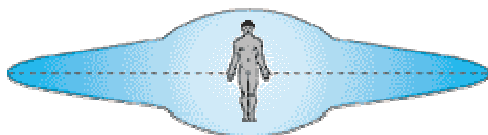

The 13 grooves of the Weber Isis Light Body Transformer stand for the holy number 13. Jesus, for example, could only work in connection with his 12 disciples ($12+1=13$). It is gilded, and the golden double-helix with 13 crystals on the inside is based on a crop circle from 1996 in England, Alton Barnes.
